Where you *discover*
what it means to be *you*

What happens at Waldorf College every day is best understood from the perspective of our students—young men and women discovering what it means to be who they are. And, for our students, this place is forever tied to that process of discovery.

Only through our students' stories can you hope to understand that:

Video Spotlights

- It can be more of an advantage than a disadvantage to earn your degree at a small college in a small town.
- Obstacles take many forms—social, economical, cultural, physical, intellectual—yet each can be overcome when used to help you realize your potential.
- It's more appealing than corny when your college is a place where nearly everybody knows your name.
- Someone believing you deserve an opportunity to succeed can bring success.

Enjoy our students' stories:

- Abbie Bergdale** - Senior, Creative Writing, Mason City, IA
- Adam Herrick** - Sophomore, Biology, Charles City, IA
